→ INPUTS

PDF — SOURCE Caregiver & Family Guide

INPUT 1

- **File:** ARC-Dialysis-Caregiver-Family-Guide-2-18-26.pdf
- **Pages:** 17 pages
- **Status:** Not accessibility-compliant
- **Content:** Text, headings, callouts, bullets, 8 Parts
- **Problem:** No tags, no semantic structure, no metadata

DOTX — TEMPLATE ARC Dialysis Letterhead

INPUT 2

- **File:** ARC-Dialysis-Kidney-Care-Letterhead.dotx
- **Type:** Microsoft Word Template (.dotx)
- **Contains:** Header logo, footer with address
- **Branding:** ARC Dialysis / Kidney Care identity
- **Challenge:** python-docx cannot open .dotx natively

FEEDS PIPELINE →

PROCESS PIPELINE

1

Extract PDF Content

VISION AI

Read all 17 pages of the source PDF using Claude's vision model. Capture text, headings, callout boxes, bullet lists, and document structure from raw page images.

Claude Vision

PyMuPDF

17 pages

8 Parts

2

Convert Template

FILE PATCH

Patch the .dotx content type to .docx so python-docx can open it, while fully preserving the branded header logo and footer address block.

python-docx

ZIP patch

content_types.xml

Header/Footer preserved

3

Rebuild Document Structure

SEMANTIC

Apply proper semantic heading hierarchy with ADA-compliant styles: **H1** Part banners → **H2** section titles → **H3** subsections. Preserve all body content.

Heading 1

Heading 2

Heading 3

Normal style

OUTPUTS →

→ DELIVERS

DOCX — WORD DOCUMENT Accessible Caregiver Guide

OUTPUT 1

- File: ARC-Dialysis-Caregiver-Family-Guide-2026-04-13.docx
- Size: 128 KB
- Structure: 8 Parts, fully hierarchical
- Language: en-US on all runs
- Branding: ARC Dialysis letterhead

- ✓ ADA-compliant heading hierarchy
- ✓ Semantic styles (H1/H2/H3)
- ✓ Document metadata set
- ✓ Callout boxes formatted

PDF — TAGGED DOCUMENT Tagged Accessible PDF

OUTPUT 2

- File: ARC-Dialysis-Caregiver-Family-Guide-2026-04-13.pdf
- Size: 261 KB
- Pages: 16 pages
- Tags: MarkInfo=Marked ✓
- Language: en-US metadata

- ✓ StructTreeRoot present
- ✓ MarkInfo = Marked
- ✓ Language tag confirmed
- ✓ Bookmarks / Outlines
- ✓ PDF/UA + Section 508

4

 **Apply Accessibility**

ADA / 508

Set document metadata (Title, Author, Language `en-US`), apply language tags on every run, add callout boxes with left-border styling, and apply List Paragraph bullets.

Lang: en-US

Document Title

Run language tags

Callout borders

List Paragraph

5

 **Export Word Document**

DOCX OUTPUT

Save the fully structured, accessible, branded document as a `.docx` file with all styles, metadata, and layout finalized.
